4.30 – 5.00	Calculating & Interpreting Test Scores	Dr. Carol To

The Hong Kong Cantonese Oral Language Assessment Scale (HKCOLAS) & The Hong Kong Cantonese Articulation Test (HKCAT)

HKCOLAS was published by the City University of Hong Kong in March 2006 as the first assessment tool of its kind developed specifically for local speech therapists' use in diagnosing language impairment of Hong Kong Cantonese-speaking pre-primary and primary school children. The instrument has been developed over a period of three and a half years through the pooling of human and fiscal resources of the Child Assessment Service (CAS) of the Department of Health (DH) of the Government of the HKSAR and the Language Information Sciences Research Centre (LISRC) of the City University of Hong Kong (CityU) and on the basis of rigorous research into the language characteristics of Hong Kong children from age 5 to 12. The instrument covers the assessment of children's comprehension and production abilities in lexis, grammar, discourse, and semantics. It has been developed based on current understanding of Cantonese linguistics and language development in children, and in accordance with established practices in test construction.

The Hong Kong Cantonese Articulation Test will be made available at the same time as HKCOLAS. This is a much improved version of the HKCAT distributed in 2002, and will be useful to qualified speech therapists in diagnosing articulation problems in Hong Kong Cantonese-speakers ranging from children two and a half years in age to adults by referring to the development norms.

Distribution of HKCOLAS and HKCAT

Only speech therapists who have attended the training workshop will be eligible to obtain a set of HKCOLAS and HKCAT at no cost, and to be awarded a certificate to administer HKCOLAS. Please complete the attached Registration Form and return it with a copy of the relevant credentials of the intended speech therapist recipient. Each qualified speech therapist may obtain only ONE set of the assessment instruments.
