

Event: Clinical Education Workshop on 10Feb 2017

Today (10 Feb) the Division of Speech and Hearing Sciences launched a clinical education workshop on clinical supervision (speaker: Dr. Margo Turnbull), evidence-based practice in SLP (speaker: Prof. Thomas Klee) and introduction of our current moves in curriculum. We are delighted to meet practising speech-language pathologists and friends in community. Sincere thanks for your time and effort to educating and growing the profession!
